APPLICATION FOR RATE INCREASE			Tr.
		<b>V</b> ==1	- <i>&amp;</i>
Comes now Aquila Inc. d/b/a Aquila Networks ("Aquila"), pursuant to the S	tate N	Nat <del>ural</del> i	1.5

Comes now Aquila Inc. d/b/a Aquila Networks ("Aquila"), pursuant to the State Naturals Gas Regulation Act, 66 Neb. Rev. Stat. § 66-1801 et seq. (2003) (the "Act") and the Rules and Regulations of the Commission, Neb. Admin. Code, Title 291, Chapter 9, Pipeline Common Carriers Rules and Regulations ("Chapter 9"), for three separate, but consolidated requests to change the rates for natural gas service provided to Aquila's customers located within Aquila's Rate Area One, Rate Area Two, and Rate Area Three.

In support of its application, Aquila states as follows:

### I. Description of Aquila

- A. In 1985 UtiliCorp United, Inc., now known as Aquila, acquired the natural gas distribution asses of Peoples Natural Gas, division of InterNorth, Inc. At that time, regulation over rates, terms, and conditions of service was vested in each municipality in which it provided service. In 1987, Aquila divided its Nebraska service territory into new Rate Areas as required by the Municipal Natural Gas Regulation Act ("MNGRA") Neb. Rev. Stats. § 19-4607, et seq. (2000). These Rate Areas were approved by the Commission pursuant to its authority under the Act.
- B. As a result of Aquila's acquisition of Minnegasco's Nebraska properties in 1993, Aquila's rate area boundaries were modified effective January 1, 1994. Ten Municipalities are currently located in Aquila's Rate Area One. Rate Area One consists of approximately 39,313 customers. Aquila's Rate Area Two consists of the City of Lincoln and the adjacent communities of Walton and Cheney, Nebraska. Rate Area Two consists of approximately 91,490 customers. Rate Area Three consists of ninety-five municipalities in eastern Nebraska. Each of these communities is as listed on Index No. 3 of Aquila's Tariff on file with the Public Service Commission of Nebraska. Rate Area Three consists of approximately 61,595 customers.
- C. Aquila's net investment in its Nebraska assets totals approximately \$140,356,677 million. Aquila has approximately 2,484 employees for all of its operations, and it employs approximately 408 employees who are located in Nebraska. Aquila's Nebraska operations relies on several other employees within Aquila's other multi-jurisdictional company, who do not reside in Nebraska.

<sup>&</sup>lt;sup>1</sup> Those 10 communities are Plattsmouth, Bellevue, Ralston, LaVista, Papillion, Gretna, Waterloo, Elkhorn, Valley, and Blair, Nebraska.

### II. Communication

A. Communications regarding this Application should be addressed to the following:

Larry W. Headley
Director of Regulatory Services
Aquila Inc.
Omaha, NE 68102
(402) 221-2023
larry.headley@aquila.com

Douglas J. Law Attorney Blackwell Sanders Peper Martin, LLP 1620 Dodge Street, Ste. 2100 (402) 964-5014 dlaw@blackwellsanders.com

Glenn W. Dee State Mgr. Rates and Tariffs – NE Aquila Inc. Omaha, NE 68102 (402) 221-2020 glenn.dee@aquila.com

### III. Background and Reason For General Rate Filing

- A. Aquila's last rate increase for Rate Area One, Rate Area Two and Rate Area Three was filed in June 2003, based on a test year ending December 31, 2002. Since that time, several events have occurred to render Aquila's current rates inadequate and its revenue requirements deficient. Among those events are increases in both the cost of providing natural gas services and the investment required to serve the growth in Rate Areas One and Two. Aquila has also made significant investments in the replacement and integrity of Aquila's system. These events have a direct impact on the costs to deliver natural gas to customers located within Rate Area One, Rate Area Two, and Rate Area Three.
- B. Aquila determined the cost to provide natural gas service to Aquila's customers within Rate Areas One, Two, and Three for the twelve months ending June 30, 2006 (base year). Aquila also compiled data using generally accepted utility practices to formulate its test year, which reflect known and measurable changes, as well as a normalization adjustment, and an annualized adjustment, as required by the Act, to the base year.
- C. The rates currently being charged the customers in Rate Areas One, Two, and Three do not and will not provide Aquila with sufficient revenue to enable it to meet the cost of furnishing natural gas to customers within Aquila's Rate Areas One, Two, or Three. Nor will those rates allow Aquila to earn a fair and reasonable return on its investment in its designated Rate Areas One, Two, or Three. In fact, a comparison of revenues to the cost of service shows that Aquila will incur a revenue deficiency of \$16,294,384 during the test period if natural gas rates are not increased.

### IV. Authority and Request For Increase In Rates

A. Under the governing laws of the United States, Nebraska law and United States Supreme Court precedent, Aquila is entitled to a fair and reasonable return on its property

OM-228683-8 2

required for service to its customers. In determining rates pursuant to the Act, the Nebraska Public Service Commission must "give due consideration to the public need for adequate, efficient, and reasonable natural gas service and to the need of the utility for revenue sufficient to enable it to meet the cost of furnishing the service, including adequate provisions for depreciation of its utility property used and useful in rendering service to the public, and to earn a fair and reasonable return upon the investment in such property." See e.g., 66-1825 Neb. Rev. Stat. § 66-1825. See also, Bluefield Waterworks and Improvement Co. v. Public Service Commission of West Virginia, 262 U.S. 679 (1923) and Federal Power Commission v. Hope Natural Gas Co., 320 U.S. 591 (1944). The currently approved tariff rates of Aquila, if continued in effect, would not meet the standard established under Nebraska law and would result in the confiscation of the property of Aquila without due process of law in violation of the Fourteenth Amendment of the Constitution of the United States and of Article I, Section 3 of the Constitution of the State of Nebraska. Aquila is suffering and will continue to suffer irreparable injury so long as the existing rates continue in effect.

### V. Rate Structure and Effectiveness

- A. Aquila therefore requests that the Commission adopt the new rates contained in the proposed rate schedules included herewith and by reference made a part hereof. Specifically, the proposed rate schedules provide for a customer charge of \$16.00 per month for residential customers and \$20.00 a month for commercial customers. In addition to the monthly customer charge, residential customers will pay \$ .14868, for each therm of natural gas consumed. This charge is in addition to the cost of gas purchased and recovered under Aquila's Gas Cost Adjustment mechanism or other charges approved by the Commission. Commercial customers will pay \$.15803 for each therm of natural gas consumed plus the cost of gas. This cost is in addition to the cost of gas purchased and recovered under Aquila's Gas Cost Adjustment mechanism or other charges approved by the Commission.
- B. Aquila requests that the rates shown in the proposed rate schedules be made effective after Commission approval in accordance with the provisions of the Act. See Neb. Rev. Stat. § 66-1838 (2003). By law, Aquila may collect those rates as interim rates, subject to refund, ninety (90) countable days after the date of filing for the increase. Neb. Rev. Stat. § 66-1838 (10)(b).
- C. In addition to the rate structure and effectiveness described above, Aquila seeks authority to implement rate recovery mechanisms (e.g., Revenue Normalization Adjustment (RNA), weather normalization adjustment (WNA), limited cost recovery (LCR)) that will provide ongoing rate adjustments. These rate mechanisms or rate adjustments are explained in more detail within the testimony.

### VI. Compliance with Filing Requirements for Rate Application

A. Aquila submits herewith certain information in its rate filing in compliance with the Commission applicable rules and regulation for general rate filings. For example, Rule 004 of Chapter 9, of the Commission rules and regulation requires Aquila's rate filing to include the following information: (1) definitions and general information, (2) computation of its revenue deficiency, (3) operating expense schedules for the base year and test year, (4) rate-of-return and

OM-228683-8 3

cost-of-capital schedules, (5) a description of each pro forma adjustment, (6) a fully allocated class cost-of-service study, (7) operating revenue schedules detailing the number and classification of customers, volume of sales, (8) operating revenue by customer classes for the base year on an unadjusted basis and for the test year on a normalized basis, and (9) current and proposed rates. See Neb. Admin. Code, Title 291, Chapter 9, Rule 4 (2003).

- B. The above requirements for each Aquila Rate Area can be found in different sections of the filing. Accordingly, all documents located behind designated tabs in this filing are hereby incorporated into this application by reference.
- C. The "Definitions" section of the filing describes the base year and test year, and defines other terms used throughout the filing, and provides other general information concerning the filing.
  - i. The "Financials" section contains a summary of the revenue deficiency computation.
  - ii. The "Base Year" section provides unadjusted "per book" financial information of the base year. Exhibits include rate base, operating revenues and expenses, capitalization, income tax computation, and return on equity.
  - iii. The "Test Year" section is financial information representing a fully adjusted base year. Exhibits include rate base, operating revenues and expenses, capitalization, income tax computation, and return on equity.
  - iv. The "Test Year Proposed" section describes the allocation of revenue deficiency between customer classes and presents the proposed rate design.
  - v. The "Adjustments" section provides an explanation of all adjustments made to the base year to arrive at known and measurable changes.
  - vi. The "Cost of Service" section provides Exhibits that explain cost allocations and the general methodology used for the cost-of-service study.
  - vii. The "Working Capital" section provides an overview of the methodology used to compute cash working capital required for day-to-day operations.
    - viii. The "Current Rates" section provides the current rate schedules.
    - ix. The "Red Line Rates" section provides the proposed changes to the "Current Rates" in the required "redline format'.
    - x. The "Proposed Rates" section provides the proposed rate schedules.
- D. In developing its test year and in preparing all of the Exhibits contained in this filing, Aquila followed generally accepted utility practices. Verification of all information by an officer of Aquila is attached to this application.

4

- E. In addition to information described above, Aquila has provided the required number of its 2006 annual stockholders report. <u>Id</u>.
- F. Aquila's direct testimony in support of its General Rate Filing is filed herewith. The testimony of the witnesses supporting Aquila's General Rate filing is identified below. Among other things, the testimony explains in detail the form of rate design, rate recovery mechanisms, and other items accompanying Aquila's request herein.

### VII. Testimony In Support of Filing

A. The following witnesses support Aquila's request for a general rate increase and form of rate recovery. The testimony is contained in the filing. The list of witnesses is provided below:

### Witness

Steve Pella, Aquila VP of Operations
Richard G. Petersen, Aquila Director of Accounting
Vern J. Siemek, Aquila Nebraska Sr. Financial Manager
Donald A. Murry, VP, C.H. Guernsey & Co.
Ruth H. Gustin, Employee Benefits Manager
Philip Beyer, Director of Benefits and Human
Resources Information Systems

Resources Information Systems
Matt Daunis, Mgr. Energy Efficiency Programs
Thomas J. Sullivan, Project Manager, Black & Veatch
Paul H. Raab, Independent Economic Consultant
Glenn Dee, State Mgr. of Rates and Tariffs
Jerl Banning, Director of Compensation

### Area

Company Policy
Accounting
Pro-Forma Adjustments
Cost of Capital
Health Care Expense

Pension Expense
Demand-Side Management Program
Cost of Service — Rate Design
Weather Norm. Adj./RNA Rates
Working Capital and Pro-Forma Adj.
Variable Compensation

### VIII. Protective Order

A. Aquila further notifies the Commission that it intends to file a request for a "Protective Order" as required under Commission Rule 005 to cover confidential information that will supplement its application and to cover any confidential information submitted in Aquila's work papers, testimony, or exhibits that will be filed throughout the review and approval of its rate application. See Neb. Admin. Code, Title 291, Chapter 9, Proposed Rule 005.01.

### IX. Municipal Negotiation and Notices of Intent to Proceed Before Commission

A. In accordance with Subsection (3) of section 66-1838 of the Act, Aquila hereby provides the notice required by the Act that it elects to forgo its right to negotiate directly with the Municipalities located within its Rate Areas, and instead desires to proceed with the review and approval of its general rate filing application by the Commission.

### X. Tariff Changes and Supporting Documentation

A. In support of this Application, and as provided in section 66-1838 of the Act, Aquila submits herewith the proposed revision to its Tariff to implement its proposed rate increases and other changes. Aquila has chosen at this time to propose minor changes to the Gas Cost Adjustment Tariff (Index No. 8), and several changes to the General Rules and Regulations Tariffs to make them more in line with the current Commission Rules and Regulations. A "redline" version of the tariff changes are included in this filing per Rule and Regulation 157, issued by the Nebraska Public Service Commission.

### XI. Request for Necessary Waivers

A. While Aquila believes this application to be in full accord with applicable law, Aquila respectfully requests the granting of such waivers as necessary for the acceptance of this application.

### XII. Rate Case Surcharge

A. Pursuant to § 66-1841 of the Act, Aquila hereby requests continuing authority to collect its regulatory costs, including the Commission's assessment through a surcharge mechanism.

### XIII. Conclusion

WHEREFORE, Aquila requests that the PSC issue an order accepting and approving this Application for Rate Increase, including the proposed rate schedules included herewith.

Respectfully submitted,

AQUILA NETWORKS, Division of Aquila, Inc.

Bv:

Jøn R. Empson

Senior Vice President – Regulatory, Legislative, and Gas Supply Services

Aquila, Inc.

My Comm. Exp. July 4, 2009

GENERAL MOTARY - State of Nebraska RICHARD G. PETERSEN

### AQUILA NETWORKS NEBRASKA RATE

### **DEFINITIONS**

- 1	Area Rate -	The rate charged for natural gas service to all customers of the same class located within the rate area.
	Base Year -	Twelve month period ending June 30, 2006. All numbers used are "per books"; i.e. unadjusted.
	Billing Unit -	The standard billing unit shall be Therms. One Therm = 100,000 Btu.
	Capitalization -	Total funds from all sources used to fund the company; e.g. long term debt and common equity.
	Class Cost-of- Service Study	Study analyzing all costs and assigning that cost directly or indirectly to the various customer classes based on causal affect.
	Customer -	Any purchaser of natural gas served by a jurisdictional utility.
	Customer Charge -	A fixed amount to be paid monthly by the customer without regard to demand or energy consumption.
	Delivery Charge -	A per unit charge, applied to customer's energy consumption, designed to recover non-gas costs associated with the utility's operation.
	Jurisdictional - Utility	A natural gas public utility subject to the jurisdiction of the Nebraska Public Service Commission.
٠.	Rate Area One -	Customers served within the municipal boundaries and surrounding areas of Bellevue, Blair, Elkhorn, Gretna, La Vista, Papillion, Plattsmouth, Ralston, Valley and Waterloo.
	Rate Area Two -	Includes the City of Lincoln, its extra territorial jurisdiction and the communities of Walton and Cheney, Nebraska.
	Rate Area Three -	Customers served within the municipal boundaries and surrounding rural areas of Adams, Arlington, Ashland, Auburn, Aurora, Avoca, Bancroft, Battle Creek, Beatrice, Bee, Beemer, Bennet, Blue Springs, Bradshaw, Clatonia, Columbus, Courtland, Craig, Crete, David City, Dewitt, Dorchester, Eagle, Elmwood, Emerson, Endicott, Exeter, Fairbury, Fairmont, Firth, Friend, Garrison, Geneva, Grafton, Greenwood, Hallam, Hampton, Hickman, Holland, Homer, Hooper, Humboldt, Humphrey, Jackson, Johnson, Lindsay, Louisville, Madison, Manley, Mead, Meadow Grove, Milford, Murdock, Murray, Mynard, Newman Grove, Nickerson,

Pawnee City, Peru, Pierce, Pilger, Plymouth, Rising City, Rosalie,

Rock, Tecumseh, Tekamah, Thurston, Tilden, Uehling, Ulyssess, Wakefield, Walthill, Waverly, Wayne, Weeping Water, West Point,

Wilber, Winnebago, Wymore, and York.

Schuyler, Scribner, Seward, Shelby, Stanton, Stapelhurst, Sterling, Table

### Rate Base

Total investment in plant and other assets dedicated to public service.
 Rate Base is equal to Net Plant-in-Service plus Working Capital plus Materials and Supplies plus Gas-in-Storage plus Prepayments minus Deferred Income Taxes minus Customer Advances minus Customer Deposits.

### Revenue Requirement

 Total of all costs required to provide utility service, including a fair return to investors.

### Test Year

- The base year adjusted for known and measurable changes.

### Working Capital

 Cash required for day-to-day operations, i.e., to cover the time "lag" between services rendered and revenue collected. It also accounts for the "lead" between revenue received and expenses paid; e.g., income taxes.

### AQUILA NETWORKS NEBRASKA

### GENERAL INFORMATION 2006 RATE CASE

### DEMAND SIDE MANAGEMENT PROGRAM

Aquila, Inc is proposing two demand side management programs in its Nebraska service area: 1) Space and Water Heating Equipment Rebates, and 2) Low-income Weatherization. These two programs will meet the needs of a broad range of customers, and allows the customer to capture savings opportunities that would otherwise be lost if standard space and water heating equipment were installed.

### LIMITED COST RECOVERY

Limited Cost Recovery Mechanism changes rates annually to reflect the normal annual increases in costs to serve gas customers. The annual increase in rates is based on increasing operating costs approved within a General Rate Case using the Consumer Price Index-Urban, and is sought to avoid large increases every three to four years.

#### NORMALIZATION

Aquila's Base Year Revenues were normalized for weather to obtain Test Year Revenue. Weather Normalization is the process of adjusting actual weather data for any impact attributable to colder or warmer-than-normal weather. Normal weather is based on thirty (30) years of historical temperature information from assigned weather stations in Aquila's Nebraska service territory.

The process is essentially a three step procedure involving:

- 1. Deriving a normalization factor.
- 2. Applying the normalization factor to the customers' heat sensitive volumes.
- 3. Adding the normalized heating load to the base load, and multiplying that sum by the June 2006 sales rate.

A customer's base load is considered the average consumption used in the months of July and August, when no space heating is needed. Space heating load is considered heat sensitive, all other is base load.

### (Normalization - continued)

The heat sensitive volumes are identified by subtracting the base load from the actual consumption. Normalization factors were developed for each weather station by billing cycle for each month of the year.

Aquila's Test Year Purchases were also normalized using the above process. The volumes determined above were multiplied by the June 2006 recoverable gas cost factors.

#### RATE DESIGN

Aquila is proposing a traditional two-part rate design for residential and commercial customers in this rate area. The total revenue requirement will be collected partially through monthly customer charges, other revenue, and applying the delivery charge to the appropriate monthly volumes used. Aquila is proposing a customer charge of \$16.00 and \$20.00 for all Residential Customers and Commercial / Energy Option Firm Customers respectively in Rate Areas One, Two, and Three. A uniform Delivery Charge of \$1.4708 per therm, and \$1.5743 per therm is proposed for the Residential Customers, and Commercial / Energy Option Firm Customers respectively.

#### **RETURN ON EQUITY**

Donald A. Murry, Ph. D., of C.H. Guernsey & Company analyzed the cost of capital of Aquila and recommended a total rate of return on capital for ratemaking purposes in the range of 9.47 percent to 9.73 percent, with a mid-point of 9.6 percent.

This total cost of capital is the result of determining that the relevant capital structure consists of Long-Term Debt of \$134,540,892 and Common Stock Equity of \$138,510,054 for a Total Capitalization of \$273,050,946. Dr. Murry determined that the embedded cost of long-term debt for ratemaking is 7.129 percent.

Embodied in the recommendation was a range of allowed rates of return on common stock of 11.75 percent to 12.25 percent, with a recommended midpoint of 12.00 percent. In reaching this recommendation, Dr. Murry reviewed the current economic environment, the level of interest rates, and the current condition of the equity markets. He also studied the financial, business and regulatory risk of Aquila Networks and other gas distribution utilities. In this analysis, he selected a group of regulated gas distribution companies that are similar to Aquila Networks for comparative purposes. He used the market-based Discounted Cash Flow method and the Capital Asset Pricing Model in his analysis of the cost of common stock equity.

To test the adequacy of the recommended return, Dr. Murry calculated the after tax interest coverage ratio that would result from his recommended return and compared this to similar coverage for the comparable gas distribution companies. This analysis confirmed that the recommended return was sufficient to attract and maintain capital, but it also showed that the recommended return was not excessive in as much as the coverage was still lower than the average coverage of the comparable gas utilities studied.

### REVENUE NORMALIZATION ADJUSTMENT RIDER (RNA)

The Revenue Normalization Adjustment Rider is a billing adjustment factor computed on a monthly basis that creates a credit or charge to the monthly delivery charge for firm customers. The mechanism is designed to stabilize the level of actual revenues by eliminating the impacts of weather and conservation.

### WEATHER NORMALIZED ADJUSTED RATES (WNA)

Aquila proposes to implement a Weather Normalization Adjustment (WNA) mechanism. WNAs are ratemaking tools that can offset the impact of unusually warm or unusually cold weather on a gas company's operating revenues and earnings. They work by utilizing an adjustment factor that increases or decreases delivery charge to compensate for deviations from normal weather that cause deviations in revenues and earnings.

This program would benefit customers by moderating winter bills in colder than normal periods. Since such periods are often characterized by both greater consumption and higher gas prices, the program provides customers with financial relief, just when they need it the most.

The Company's proposed WNA incorporates the following features:

- 1. Over- and under-collections are calculated on a monthly basis, and recovered the following month.
- Weather normalization will be performed using the same factors that are used to develop normal weather volume and applied to the same rate classes whose sales are weather normalized during the case.
- 3. The Company will collect/refund the revenue difference in a separate rider, applied to the delivery charge of each rate.

#### AQUILA NETWORKS NEBRASKA 2006 RATE CASE

#### **CASH WORKING CAPITAL**

The purpose of the cash working capital allowance is to compensate the investors for the use (value) of their money when the Company is required to pay expenses prior to receiving from the ratepayers the revenues associated with those expenses.

Lead/lag measures the amount of cash working capital needed by looking at the timing difference between when cash comes in and when it is disbursed for various expenses.

#### I. REVENUE LAG

#### A. Metering Period

Aquila Networks' ("Aquila"), meters are read and bills are computed on a monthly basis. Therefore the total days of lag between initially providing service to a customer during any billing period and the date of reading the customer's meter is an average of 30.4 days. This means that the company does incur expenses associated with that customer for 30.4 days before his meter is read. Since a lead-lag computation is on an average basis, the average number of days of lead would be approximately one-half of the 30.4 days or 15.2 days which represents the midpoint of the metering cycle.

#### B. Processing Time

Aquila's billing schedule allows two days to read an individual meter within a billing cycle and two days to process the reading and issue the actual bill. The bill is mailed the next day (5 days).

This schedule represents the average processing time that has been established to allow for bill calculation in the most efficient time possible. The cycle processing schedule minimizes possible deviations and maximizes the efficient and effective use of Aquila's resources. This process accommodates the majority of normal situations.

#### C. Collection Period

The Collection Period of the system is calculated as follows:

The average lag time for the Nebraska revenue system is calculated by first reviewing the company's monthly aged Accounts Receivable report for Nebraska. On

each of these reports, there are summaries of amounts in arrears for under 30 days, 30 to 60 days, 60 to 90 days, and over 90 days.

By comparing each of these amounts to the next longer outstanding period, in the following billing month, the amount paid within the period is determined. For example, the decrease of outstanding amount from the 30 to 60 days period in the billing month of January, to the 60 to 90 days period in the billing month of February, represents the amount being paid within the 30 to 60 days period. The amount being paid within a period is assumed to be paid in the middle of each period. Each Nebraska customer receives 20 days to pay their bill. Electronic Fund Transfer customer's payments are deducted from their accounts on the 20<sup>th</sup> day. The amount paid current is assumed to be paid in the middle of the period. A bill is not considered past due until after the 20<sup>th</sup> day. Payments are assumed to have taken place in the middle of the period or on the 25<sup>th</sup>.

Summarized below is a general layout of the calculation used to determine the revenue average lag days for all cycles.

\$Amount	x	No. of Days	= \$ - Day
Under 30 days/before due	X	10	=
Under 30 EFT Payments	X	20	-
Under 30 days pd after due	X	25	=
20 to 30 days	X	25	=
30 to 60 days	X	45	=
60 to 90 days	$\mathbf{x}^{-}$	75	=
90 to 120 days	X	105	=
Total \$	and the second		=Total \$ - Day

No. of lag days =  $\frac{\text{Total }\$ - \text{Day}}{\text{Total }\$}$ 

The above calculation weighs each dollar amount by the number of days outstanding. Therefore, the number of lag days calculated for the system is the weighted average days. A 25.74 day lag for the collection period of the revenue system is obtained by using the following formula:

\$ - Day \$ Amount

#### II. EXPENSE LEAD

#### A. Payroll

Field employees are paid bi-weekly (every other Friday). There are 26 pay periods in the year. The average lead time for these employees is calculated as follows:

$$365 \div 26$$
 pay periods = 14.0 days

The average lead time would be one-half of the 14.0 days or 7.0 days. This is the number of days between the midpoint of the pay period and the date the check is issued.

#### B. Gas Purchase Expense

#### 1. Delivery

Gas supplied through the NNG, NGPL, and KMI Pipelines are received on a fiscal monthly basis between the first of one month and the first of the next month. The average lead time due to the delivery of gas is calculated as follows:

365 days divided by 12 months = 30.4 days per month 30.4 days divided by 2 = Average of 15.2 days

The 15.2 Days represent the midpoint of monthly delivery of gas.

#### 2. Payment

Payment of delivered gas is due according to the Pipeline Invoice. Individual gas invoices were analyzed for twelve months ending June 30, 2006. A weighted average from the delivery date of the gas to the payment of the invoice was computed. The number of days from the delivery period to date paid multiplied by the amount paid was divided by the total amount paid to arrive at the total lead time for gas purchases expense of 41.12 days. Occasionally, a vendor would require Aquila to prepay for gas to be delivered. Prepaid invoices were not included in the computation.

#### C. Other Operation and Maintenance Expense

An analysis of cash disbursements was performed to determine the number of days between the receipt of goods or services and the payment date of the invoice. Payments for the twelve months ending June 30, 2006 were reviewed for Nebraska Operations.

Based on the number of days between the receipt of the goods or services and the payment date of the selected invoices, an average lead day is calculated. This lead day is then weighted by the total dollar amount to arrive at a composite weighted average lag day of 26.11 days.

#### III. <u>SUMMARY</u>

The results of this lead-lag study indicate that Aquila's Nebraska operations overall, had lag time for each of its major classification of expense.

Tho	dotorr	nination	Λf	the	average	100	tima i	٠.
1116	acten.	шшаион	. UI	mc	average	iag	mine is	э.

Metering Period	-		٠.	15.2	days
Processing Bills				5.0	days
Collection Period				25.7	days
		the state of		45.9	days

The determination of the average lead time is:

Payroll	7.0	days
Purchased Gas	41.1	days
Other Operations and	26.1	days
Maintenance Expense		

The number of days that cash is required for payroll, purchased gas, and other operation and maintenance expense is calculated as follows:

#### Payroll:

Lag Time	 45.9 days
Less Lead Time	 7.0 days
Number of days cash required	38.9 days

#### Purchased Gas:

Lag Time		45.9 days
Less Lead Time		41.1 days
Number of days cash required		4.8 days

#### Other Operations and Maintenance Expense:

Lag Time	F	45.9 days
Less Lead Time		26.1 days
Number of days cash required		19.8 days

The total cash required for a test year is then calculated for each of the three major categories, (payroll, purchased gas, and operation and maintenance expense) by applying the following steps.

- 1. Determine the annual amount of expense for each of the major categories.
- 2. Determine the amount per day by dividing the annual amount by 365 days.
- 3. Multiply the amount per day by the number of days that cash is required, as calculated above, to determine the total cash working capital requirements.
- 4. Net cash working capital is determined by reducing the total cash requirements by cash available from federal and state income tax accruals, and property tax accruals, and adding back the cash needs associated with interest accruals.

The net cash working capital requirement is added to the other components of working capital such as materials and supplies, prepaid expenses, and deferred charges.

#### SUMMARY OF ADJUSTMENTS

#### Adjustment 1 Capital Additions (All rate areas)

Capital additions for system integrity (relocations and replacement of existing mains and services due to their condition) will be expended during the second half of 2006 and the first half of 2007 construction season. It also include replacement of the Automated Meter Reading ("AMR") devices.

#### Adjustment 2 Offutt Housing Investment (Rate Area One)

Construction costs, O&M, and Depreciation were increased to reflect the expected level of investment and costs when the rehabilitation/renovation/demolition of Offutt AFB residential housing units is complete. Margins were decreased to reflect the planned demolition of 1,876 original units, the renovation of 572 other units, and the construction of 916 new units. 1,631 units will replace the original 2,591 units.

#### Adjustment 3 Lincoln Lateral Line (Rate Area Two)

The Memorandum of Understanding ("MOU") dated September 11, 1989 entered into and between the City of Lincoln and Minnegasco (now Aquila) for the governance of the Lincoln Lateral Project allows the utility to include the same Lincoln Lateral costs in base rates, instead of the purchase gas adjustment. Aquila is proposing dissolving the separate company required by the MOU and merging the cost into Aquila-Networks Nebraska.

#### Adjustment 4 Annualized Depreciation Reserves (All rate areas)

Depreciation and amortization expense was adjusted to reflect the annualization of expense based on June 2006 plant balances. The adjustment is the difference between the actual expense for the twelve months ended June 30, 2006 and the annualized amount, and recognizes changes in the annual level of expense associated with additions and retirements occurring during the test year. This adjustment is included in the accumulated provision for depreciation for rate base.

The adjustment also reflects new depreciation rates determined by an independent depreciation study that analyzed the assets recorded in Aquila's property records for Nebraska. This adjustment includes the current rates used for the common assets that serve all utilities within the Aquila Network and are commonly known as shared assets and the amortization of the deferred depreciation expense accrued since the last rate case for those assets.

#### Adjustment 5 Gas Storage Adjustment (All rate areas)

The volumes/cost of natural gas going into storage during the last six months of 2006 is expected to be significantly higher than the volumes/cost reflected in the June 30, 2006 balance.

#### Adjustment 6 Payroll Annualization (All rate areas)

Nebraska direct and allocable payroll expense was annualized using base annual payroll as of August 15, 2006, this being the most current base payroll available at the time of the calculation. The base pay amount was adjusted for known vacancies and other-than-base-payroll categories such as overtime, stand-by, and call-out pay. The annualized amount was then compared to the 12-months ended June 30, 2006 actual payroll to determine the amount of the adjustment. This adjustment amount was then allocated to FERC accounts based on the 12-months ended June 30, 2006 actual expense by account, providing the split between utility, capitalized and other payroll.

Employee Benefits were adjusted to reflect the changes made to payroll by using an average ratio of per book benefit costs to per book payroll costs for the 12-months ended June 30, 2006 period and applying this ratio to the annualized level of payroll. This benefit adjustment amount was also split between utility, capitalized and other payroll based on 12-months ended June 30, 2006 actual payroll expense.

Variable Compensation ('VC") was adjusted by comparing actual incentives paid in March 2006 to the June 30, 2006 annualized accrual. This adjustment amount was then allocated to FERC accounts based on the 12-months ended June 30, 2006 accrual expense by account, providing the split between utility, capitalized and other payroll.

Payroll taxes were adjusted for annualized payroll and VC levels by calculating payroll taxes by person at the annualized payroll levels. A comparison was made between the actual utility payroll taxes accrued 12-months ended 6/30/2006 and the annualized utility payroll tax level.

#### Adjustment 7 Variable Compensation Plan Change (All rate areas)

An adjustment was made for the Variable Compensation Plan payout in March 2007 to reflect plan changes. Variable Compensation and associated payroll tax expense were adjusted by increasing the March 2006 payout by 150% after EOS eliminations were made.

#### Adjustment 8 Rate Case Expense (All rate areas)

O&M expenses were increased to reflect the current year amortization of the estimated expense that will be incurred in completing this rate case. The total costs for the three rate areas are estimated to be \$500,000. The estimated cost will cover legal representation, outside consultants, filing fees, and miscellaneous out-of-pocket expenses. One third of the un-amortized costs are included in the Rate Base. The total cost is being allocated to all rate areas evenly.

#### Adjustment 9 Economy of Scale ("EOS") (All rate areas)

Annualized Payroll and Variable Compensation pay, along with their associated benefits and payroll taxes, were reduced for known staffing reductions to occur through December 2006 due to the sale of various utility properties.

Adjustment 10 Merit Inventive (All rate areas)

Annualized payroll expense, benefits and payroll taxes were adjusted to reflect non-union merit and union contract increases scheduled through the first quarters of 2007. A split was made between union and non-union expense to reflect the differences in various union contract increases versus non-union increases. The payroll adjustment amount was allocated to FERC accounts based on the test period actual payroll by account, providing the split between utility, capitalized and other payroll. The increase to Benefit expenses was calculated based on the percent of benefits to total payroll as reflected in the Annualized Payroll Adjustment. A payroll tax rate of 7.4% was applied to adjust the payroll tax level for the increases.

#### Adjustment 11 Weather Normalization (All rate areas)

Actual volumes, revenues, and purchases reflect 2005-2006 warmer-than-normal weather conditions. Test year volumes, revenues and purchases should be based on normal weather conditions. Actual volumes, revenues, and purchases were adjusted to reflect normal weather.

#### Adjustment 12 Correct cost allocation to OPPD Contract (Rate Areas One & Three)

Aquila has been notified that OPPD will no longer contract with Aquila to read OPPD meters effective March 31, 2007. Direct costs of reading the OPPD meters will be eliminated, but indirect costs allocated to the OPPD contract will revert to remaining Aquila operations.

#### Adjustment 13 Bad Debt Margin Adjustment (All rate areas)

The Nebraska Public Service Commission granted Aquila's Application NG-0004.1 to recover the gas cost portion of Aquila's uncollectible accounts through the Purchase Gas Adjustment ("PGA") process. This adjustment removes the gas cost portion of uncollectible accounts from base rates (O&M).

#### Adjustment 14 Advertising Reclassification (All rate areas)

O&M expense was decreased to eliminate the advertising costs charged to FERC account 913000 and 930100.

#### Adjustment 15 Contributions and Dues Adjustment (All rate areas)

**Dues Adjustment** – "Employee" dues are charged to FERC account 921000 and the "Utility" (Company) dues are charged to FERC account 930200. This adjustment reduces the amount of expenses for dues included in the Test Year by 50% in both accounts.

Contributions Adjustment – Contributions are charged to FERC account 426100 and are not included in Base Year expenses. This adjustment includes 50% of the contributions in the Test Year. Political Contributions and Lobbying Contributions/Gifts are excluded from this adjustment.

#### Adjustment 16 Benefit Adjustment (All rate areas)

The Benefit Adjustment increases O&M expense for the projected increase in costs for Pension, Health and Dental per FAS 106OPRB, Supplemental Retirement, and Employee contribution for Benefit expenses. Costs are higher in 2006 and are projected to increase by an additional 14.8% in 2007.

#### Adjustment 17 Property Tax Annualization (All rate areas)

Property Tax expense was adjusted to reflect actual property taxes paid through 2006 versus the estimated accrual in the 12-months ended June 30, 2006.

#### Adjustment 18 Annualized Postage Adjustment (All rate areas)

The postage adjustment is for the increase in postage rates for 2006 to the estimated increase for 2007.

#### Adjustment 19 Annualize/Normalize Insurance Costs (All rate areas)

This adjustment reflects current premium costs for premiums effective January 1, 2006 and February 2, 2006, normalizes self-insurance costs to three-year average costs, and includes forecasted decreases in insurance cost.

#### Adjustment 20 Raytown Lease Adjustment (All rate areas)

This adjustment removes the lease expense for the Raytown office building that is for sale and not being used.

#### Adjustment 21 Graphical User Interface (GUI) (All rate areas)

This adjustment decreases O&M expense to eliminate the cost associated with the GUI Application write off.

#### Adjustment 22 Synchronization Adjustment (All rate areas)

This adjustment synchronizes test year revenues with per-book billing units and test year gas costs. The synchronization adjustment results in test year revenues that are equal to test year billing units times the applicable existing rates. The same test year billing units times the proposed rates will accurately measure the revenue impact of the proposed rates.

#### **GENERAL INFORMATION - DEFINITIONS**

#### 1. Cubic Foot of Gas

For the purpose of testing as under these rules, a cubic foot of gas means that amount of gas which, when saturated with water vapor at a temperature of sixty degrees (60°) Fahrenheit and subjected to an absolute pressure equal to thirty inches (30°) of mercury, at thirty-two degrees (32°) Fahrenheit, (14.73 pounds per square inch), occupies a volume of one (1) cubic foot.

#### 2. Heating Value of Gas

The minimum heating value (Btu) of natural gas distributed by this Company shall be not less than 900 Btu, the measurement being made conforming to standard conditions of these rules and regulations.

#### 3. Local Pressure Base

For the purpose of measurement of gas to a customer, a cubic foot of gas shall be taken to be the amount of gas, which occupies a volume of one (1) cubic foot under the conditions existing in such customer's meter as and where installed.

#### SERVICE FEE SCHEDULE – ALL AREAS

The following Schedule of Fees shall be collected by Company in all areas served in Nebraska.

	Type of Charge	Normal Working Hours	After Hours
1.	Turn on charge (connection)	\$ 26.00	\$100.00
2.	Reconnect charge	\$ 30.00	\$100.00
3.	NSF (returned check charge)	\$ 20.00	_
4.	Residential meter move and reinstallation charge	\$450.00	_
5.	Commercial meter move and reinstallation charge	e T & M**	
6.	Meter test charge***	T & M	
7.	Temporary meter charge	\$100.00	<b>-</b>

- \* In the event that a customer is disconnected and a reconnection of service at the same premises within a period of twelve (12) months, the Company may collect as a reconnect fee the sum of such customer charges as would have occurred during the period of disconnection, in addition to the reconnect fee.
- \*\* Time and materials
- \*\*\* Based on Company's determination of meter test history and billing inquiries

#### PURCHASED GAS COST ADJUSTMENT (PGA)

#### I. TRADITONAL SALES SERVICE

#### 1. Purchased Cost of Gas:

For purposes of calculating the monthly gas purchase price per therm (PGA), costs shall include, but not limited to, upstream pipeline capacity, interstate pipeline transition charges, PNG Pipeline (Rate Area II only), interstate pipeline or supplier refunds, wholesale commodity cost, pipeline commodity transportation fuel.

The monthly PGA factor per therm shall be shown on the bill as a separate line item.

#### 2. Computation:

In addition to the base rates in effect for residential and commercial service, a charge per therm shall be added for the monthly average cost of purchased gas. The monthly charge per therm shall be calculated as follows:

$$PGA = \frac{G - R}{S}$$

Where:

PGA = Monthly estimated purchased gas cost factor per therm.

- G = The annualized estimated delivered costs, including L&U, for natural gas purchased for resale, based on prices in effect for the current month.
- R = The annualized amount of any refunds received from any gas suppliers or interstate pipeline.
- S = Estimated annual firm sales volumes (therms).

#### 3. Annual Gas Cost Reconciliation:

Annually, on or before October 1st, Aquila shall compute a "Gas Cost Reconciliation Factor" (GCR) for each Rate Area. The computation will compare the actual cost of gas purchased (including propane) with actual billed revenue arising from the components of retail rates, which are attributable to the cost of gas purchased. Each such comparison shall be for the year ended the immediately preceding August 31. The computation will specify a reconciliation rate adjustment to become effective November 1. This GCR adjustment will correct for any difference between gas cost incurred on behalf of the traditional sales customer and gas cost recovered for the reconciliation year ended August 31, and will correct for the previous year's reconciliation adjustment.

Date Issued: May 1, 2006 Issued By: Steven M. Jurek Vice President, Regulatory Affairs Effective Date: November 1, 2006

## PURCHASED GAS COST ADJUSTMENT (PGA) (Continued)

$$GCR = \underbrace{P - BR + D}_{S}$$

Where:

P = Actual annual cost of all gas cost components described in Paragraph I(1).

BR = Annual billed revenue for the reconciling period described in Paragraph I (3).

S = Estimated annual sales volumes (therms) for the PGA customers.

D = Annual bad debt component as allowed in Docket No. NG-004.1.

The GCR factor per therm shall be shown as a separate line item on the customer's monthly bill.

#### II. ANNUAL PRICE SALES SERVICE (optional)

#### 1. Annual Price Option Cost of Gas:

The rate per therm for the Annual Price Option cost of gas shall remain constant during the twelve month period beginning November 1 and ending October 31 of the following year. The Annual Price Option (APO) shall be calculated on a per therm basis and shall include, but not limited to, upstream pipeline capacity, interstate pipeline transition charges, PNG Pipeline (Rate Area II only), interstate pipeline and supplier refunds, estimated wholesale commodity cost, pipeline commodity transportation, and fuel.

The APO shall be shown on the customer's bill as a separate line item labeled "PGA".

#### 2. Computation:

In addition to the base rates in effect for residential and commercial service, a charge per therm shall be added for the monthly usage of natural gas. The APO charge per therm shall be calculated as follows:

$$APO = \frac{G - R}{S}$$
 (Shown as "PGA" on customer's bill)

## PURCHASED GAS COST ADJUSTMENT (PGA) (Continued)

Where:

APO = Annual Price Option gas cost factor per therm.

- G = The estimated annualized estimated delivered costs, including L&U for natural gas purchased for resale, based on price projections for the twelve month period.
- R = The annualized amount of any refunds received from any gas suppliers or interstate pipeline.
- S = Estimated annual firm sales volumes (therms).

#### 3 Annual Gas Cost Reconciliation:

Annually, on or before October 1st, Aquila shall compute a "Gas Cost Reconciliation Factor" (GCR) for each Rate Area. The computation will compare the actual cost of gas purchased (including propane) with actual billed revenue arising from the components of retail rates, which are attributable to the cost of gas purchased. Each such comparison shall be for the year ended the immediately preceding August 31st. The computation will specify a reconciliation rate adjustment to become effective November 1st. This GCR adjustment will correct for any difference between gas cost incurred on behalf of the APO customers and gas cost recovered for the reconciliation year ended August 31st and will correct for the previous year's reconciliation adjustment.

Second Revised: Index No. 8

Replacing: First Revised Index No. 8
Effective: December 1, 2005

#### Nebraska Operations

Sheet 4 of 4

## PURCHASED GAS COST ADJUSTMENT (PGA) (Continued)

 $GCR = \underline{P - BR + D}_{S}$ 

Where:

- P = Actual annual cost of all gas cost components described in Paragraph II (1) above, purchased on behalf of APO customers.
- BR = Annual billed revenue for the reconciling period described in Paragraph II (3).
  - D = Annual bad debt component as allowed in Docket No. NG-004.1.
  - S = Estimated annual sales volume (therms) for APO customers.

#### III. GENERAL REMARKS

#### 1. Lost and Unaccounted for Gas (L&U):

Annually, on or before August 31, Aquila shall compute the L&U Factor, which measures system losses due to leaks, variances in meter calibration, friction losses, etc. The factor shall be computed by comparing total system inputs (receipts) to total system outputs (deliveries).

The factor, up to an allowable of 4% shall be applied to the estimated average annualized delivered gas cost for all sales customers and added to the estimated annualized cost to determine the monthly purchased cost of gas.

#### 2. Bad Debts Currently Collected in Rates:

The bad debt component "D" is computed annually, and is the difference between the gas purchase component of actual Net Write-offs and the gas purchase component of bad debt expense currently being collected in rates. The gas purchases components of bad debt expense currently being collected in rates are: Rate Area One \$63,956; Rate Area Two \$382,472; Rate Area Three \$113,290.

#### 3. Remaining GCR Balance:

Any GCR remaining balances at the end of a 12-month amortization period shall remain with customers electing the APO for the ensuing 12-month period. Similarly, any remaining balance in the GCR attributed to traditional sales customers shall remain with traditional sales customers. Pro rata adjustments to the GCR balance will be made to reflect the migration of customers between the APO Program and Traditional Sales Service.

## RATE SCHEDULE ANNUAL PRICE OPTION – PILOT PROGRAM

- 1. AVAILABILITY: Service under this rate schedule is available only to any residential customer located in Aquila's service territory and who has elected this service for the twelve month period. Initial availability under this pilot program is limited to a prescribed number of residential customers in each of Aquila's Rate Areas on a first-come, first-served basis. The program will be limited to those customers receiving verification of their election from Aquila.
- 2. APPLICABILITY AND CHARACTER OF SERVICE: The program's twelve month period is from November 1 through October 31<sup>st</sup>. This rate schedule shall apply to firm gas service for customers whose normal requirements do not exceed 500 Therms on a peak day and such service shall not be subject to curtailment or interruption. The rate per therm for the delivered commodity cost of gas, including upstream pipeline cost, (PGA) shall be held constant during the twelve months beginning November 1 and ending October 31 of the following year.

**Customer Charge:** 

Per Index No. 13

Delivery Charge (Base Rate):

Per Index No. 13

Cost of Gas

Per Paragraph 4 below

Minimum monthly bill shall be the Customer Charge.

The Customer and Delivery Charges may change during a program year if approved by the Nebraska Public Service Commission ("NPSC") as a part of a separate rate application.

4. COST OF GAS: The cost of gas includes the PGA and an Annual Gas Cost Reconciliation (GCR) factor, and is in addition to the Customer and Delivery Charges shown above.

The PGA as defined in Index 8, Section II(2), will be shown as a separate component on the customer's bill and shall remain fixed for the twelve months beginning November 1 and ending October 31<sup>st</sup> of the following year.

The Gas Cost Reconciliation factor (GCR), as computed in Index No. 8, Section II(3), will also be shown as a separate component on the bill.

# RATE SCHEDULE ANNUAL PRICE OPTION – PILOT PROGRAM (Continued)

- 5. DUE DATE: Bills will be due 20 days after Aquila's Mailing Date.
- 6. LATE PAYMENT PENALTY: One percent (1%) of balance not paid on or before due date.
- 7. FRANCHISE FEE: A franchise fee will be added to the monthly bill computed on this rate schedules when appropriate.
- 8. REGULATORY ASSESSMENT AND TAXES: Regulatory Assessment or other taxes, fees, or charges required by a governmental authority will be added to the monthly bill.
- 9. CUSTOMER EDUCATION SURCHARGE: A surcharge for customer education, promotion, and other expenses associated with Aquila's Annual Price Option Program may be shown as a separate component on the bill. The Customer Education Surcharge shall be computed once annually, based on actual expense incurred, and collected from all residential customers.
- 10. REMARKS: The PGA shall be determined on or before May 1 of each year. The GCR will be determined on or before October 15<sup>th</sup> of each year as part of the Annual Gas Cost Reconciliation. Both the PGA and GCR will be effectuated on November 1<sup>st</sup> of each year.
- 11. TERMINATION: The Annual Price Option Program is a pilot program and may be cancelled at the sole discretion of the Company subject only to any further abandonment approval required by the Company from the Nebraska Public Service Commission. Any over (under) GCR balance attributed to this program at the time of termination will be added to the General Service GCR for the following year, or will be dissolved through any other mutually accepted mechanism adopted by the Company.

# RATE SCHEDULE **ENERGY OPTIONS PROGRAM** (Transportation)

#### 1. **AVAILABILITY:**

Available only to any Commercial or Small Industrial Firm customer in Nebraska with natural gas transportation requirements of less than 500 Therms per day for the delivery of gas owned by the customer from Aquila's Town Border Station(s) to a meter location on the customer's premise. Customer must sign a contract with a qualified Marketer participating in Aquila's Energy Options Program. An Energy Options Marketer's participation in Aquila's Energy Options Program is conditioned on the Marketer's compliance with the following requirements: 1) providing Aquila with a copy of its approved Competitive Natural Gas Provider (CNGP) certificate from the Public Service Commission and 2) entering into a "Marketer Agreement" setting forth nondiscriminatory operating conditions and related requirements, rights, obligations and agreements. applied by Aquila without preference to any Marketer or affiliate. Aquila reserves the unilateral right to alter or amend or revise the requirements under this Energy Options tariff or it Marketer Agreement, subject to Commission approval.

Availability of local gas transportation services under the Energy Options Program is subject to system operational considerations. This Energy Options program is not available to Residential Customers of Aquila.

#### APPLICABLITY AND CHARACTER OF SERVICE: 2.

This Rate Schedule shall apply to Commercial or Small Industrial Firm Customers whose natural gas transportation requirements are less than 500 Therms per day and such transportation service is not subject to interruption.

# RATE SCHEDULE ECONOMIC DEVELOPMENT RATE

- 1. AVAILABILITY: This rate schedule is available to any new developing residential subdivision or new or expanding commercial customer that will increase the use of Aquila's existing infrastructure and resources, and provide strategic community growth or economic development.
- 2. APPLICABILITY AND CHARACTER OF SERVICE: This rate is applicable at Aquila's discretion to customers using natural gas as their primary energy source for space heating, water heating, or processing. In the alternative, to avail its service to customers in the targeted community, Aquila may, for documented reasons, adjust the factors in its feasibility study for the subdivision to reflect no less than the incremental costs of adding those customers.

3. RATE INFORMATION:

**Pipelines**

#### GENERAL SERVICE TERMS AND CONDITIONS

## 1. Application for Service

Upon approval of an application for service, the Company shall supply the customer with service at the rates and under the rules, terms, regulations and conditions applying to the particular service for which application is made and set forth in said application.

## 2. Customer

Customer shall mean any non-interruptible purchaser of natural gas within a municipality with requirements of less than one hundred thousand cubic feet of natural gas per day. A single application for service cannot be made to apply to different locations or to cover more than one meter at the same address or location to be used by the same customer.

The definition of commercial and residential customers should be as follows:

#### Residential:

Customers taking natural gas for residential use (space heating, cooling, water heating, clothes drying, etc.) through an individual meter in a single family dwelling or building, or for residential use in an individual flat or apartment, or for residential use in not over four households served by a single meter in a multiple family dwelling. Residential premises used regularly for professional or business purposes (doctor's office, small store, etc.) are considered as residential where the residential natural gas usage is half or more of the total gas usage. This classification applies to any non-interruptible residential purchaser of natural gas within a municipality with requirements of less than one hundred thousand cubic feet of natural gas per day.

#### Commercial:

Customers primarily engaged in wholesale or retail trade, agriculture, forestry, fisheries, transportation, communications, sanitary services, finance, insurance, real estate, personal services (clubs, hotels, rooming houses, five or more households served under a single meter, auto repair, etc.) government and customers whose usage does not directly qualify for residential service. The size of the customer or volume of natural gas used is not a criteria for determining commercial designation. The nature of the customer's primary business or economic activity at the location served determines the customer classification. This classification applies to any non-interruptible commercial purchaser

#### GENERAL SERVICE TERMS AND CONDITIONS

of natural gas within a municipality with requirements of less than one hundred thousand cubic feet of natural gas per day.

# 3. Meters and Regulators

The Company shall furnish meters and meter connections at no extra cost to customer. Meters and meter connections are to be set and maintained at customer's property line; however, in some cases it will be more feasible to set meters on customer's property, this to be decided by the Company. The meter and meter connections are the property of the Company, and may be removed when the service is terminated for any cause. All yard lines, interior piping, valves, fittings, and appliances on the premises of the customer shall be furnished by the customer and are subject to the approval of the Company and the municipal authorities which have jurisdiction.

# 4. Customer's Piping and Appliances

Customer shall install and maintain the gas piping, fixtures, and appliances on his premises in accordance with the ordinances of the city in which customer is located or, in the absence of such regulations, same shall be installed in accordance with recognized standards; and the Company may suspend service to customers if it shall have given written notice of defective or unsafe conditions liable to impair its service or to result in injury or damage to any person, or the property of any person or persons, provided, however, that the Company assumes no responsibility whatsoever for the inspection and/or repair of defects in customer's piping, fixtures, or appliances in or on customer's premises and will not be responsible for any injury, loss or damage resulting from such defects or improper installation.

#### 5. Inspection by Company

Customer shall permit employees and inspectors of the Company, when properly identified, to enter their premises at reasonable hours to examine the piping, appliances, and other equipment relating to the Company's service and to ascertain connected loads and make necessary tests.

#### 6. Liability

The Company shall not be liable for damage to the customer or to third persons resulting from the use of the service on the customer's premises or from the presence of the equipment on the customer's premises.

#### GENERAL SERVICE TERMS AND CONDITIONS

# 7. <u>Interruption of Service</u>

If the service shall be interrupted at any time, the Company shall not be held liable for such interruptions. In such case, the Company shall make every possible effort to restore the service at the earliest moment. Interruptions in service shall not, however, relieve the customer from any charges for service actually rendered.

It is further agreed that the Company shall incur no liability for any failure to furnish gas due to fire, the action of the elements, burnouts, broken pipes, accidents, strikes, riots, war, failure of gas supply or to any cause beyond the control of the Company, or to acts other than the Company's own willful neglect.

# 8. Service Limitation - Not for Resale

The service furnished is for the sole use of the customer who shall not sell any of such service to any other person or permit any other person to use the same without written consent to the Company. For the violation of this condition, the Company may, after forty-eight hours written notice, remove its meters and discontinue its service.

#### **CUSTOMER DEPOSITS**

# **Deposit Policy**

# 1. Residential:

The Company will require a cash deposit on residential customers that demonstrate credit risk. Demonstrated credit risk is defined as having more than one late payment in the last twelve months.

The deposit amount should be equal to the one month's highest energy bill in the previous twelvemonth period. The customer may pay deposits in installments not to exceed three months. Customer deposits shall accumulate interest to be calculated annually and paid at an annual rate of simple interest of 5%.

Deposits for residential customers will be reviewed annually and refunds made to customers whose account is current and no more than one payment within the past twelve months was made after the due date.

## 2. <u>Commercial</u>:

The Company may require a cash deposit on commercial customers that demonstrate credit risk. Demonstrated credit risk is defined as having more than one late payment in the last twelve months.

The deposit amount should be equal to one and one-half times the highest energy bill in the previous twelve-month period. Customer deposits shall accumulate interest to be calculated annually and paid at an annual rate of simple interest of 5%.

Deposits for commercial customers will be reviewed annually and refunds made to customers whose account is current and no more than one payment within the past twelve months was made after the due date.

#### 3. Hardship Deposit Waiver or Suspension:

From time to time and upon no less than one-day notice to the Commission, Company may waive or suspend the Customer deposit requirement for a reasonable period of time during periods of Customer extreme hardship in order to avoid disconnection of Customer's natural gas service or to promote additional Customer reconnections.

The waiver or suspension of the Customer deposit requirement for hardship includes, but is not limited to, deposits required soon after the Cold Weather period expires. The waiver or suspension shall apply to all new customer deposits required during the waiver or suspension period. The Customer deposit waiver or suspension may be limited by Company to either its Residential or Commercial class of customers.

Sheet 1 of 2

#### BILLING AND PAYMENT

## 1. Bills, Duplicate Bills, Failure to Receive Bills

All bills periodically rendered to customers for metered services shall be based on actual or estimated readings at local pressure base and shall show in addition to the net dollar amount due, the date on which the current reading was taken, the meter readings at the beginning and end of the period for which the bill is rendered, the date when payment is due, the total consumption expressed in cubic feet or other unit of service recorded by the meter read, and whether the bill is actual or estimated.

Bills may be rendered based on bimonthly meter readings whereby the customer's meter will actually be read ever other month. In those months where the meter is not actually read, the customer's bill will be computer or manually estimated.

Upon request, the Company shall give the customer the approximate date on which he should receive his bill each month; and if a bill is not received or lost, the Company shall, upon request, issue a duplicate. Failure to receive a bill shall not relieve a customer from complying with the applicable rate schedule and these general service terms and conditions.

## 2. <u>Due Dates of Bills</u>

Bills, including charges for gas service, deposits and other charges contained in this tariff are due and payable within twenty days after mailing. An unpaid bill will not be considered past due until twenty days after mailing. The due date shall be clearly stated on the face of the bill.

## 3. Streamline and CheckLine™ Plans

#### A. Streamline Plan

The Company shall offer to all residential and commercial firm customers in good standing an "Streamline Plan" billing program, which allows the customer to pay a uniform amount for eleven (11) months with the twelfth (12) month (July) being the month to balance the account. Such customers may enroll in the program during any month of the year. Participation in this program would be at the Customer's option and request, and all normal billing and consumption information would be shown on the billing statements in addition to the monthly Streamline payment amount.

#### B. CheckLine<sup>TM</sup> Plan

CheckLine™ is available to all customers with a bank or credit union account. Customer authorizes monthly energy billing to be charged to their checking or savings

#### DISCONNECTIONS

## 1. Energy Diversion

If any device is found installed on customer's premises which prevents the meter from accurately recording consumption, notice may be issued to the customer giving ten (10) days in which to remove such device and related appurtenances. Company has the right to bill customer for any damage to company property and estimated amounts of gas consumed, but not properly registered.

As an alternative to the above, the Company may elect to remove or correct any energy-diverting device in which case any temporary interruption of service for the purpose of repair or remedy shall not constitute discontinuance, and thus shall not require advance notice.

However, written notice must be left at the premises advising the customer of the nature of the violation, the steps Company is taking to correct it, and Company's right to bill for any damage to company property and estimated consumption not properly registered.

In and by itself, discovery that a meter has been tampered with shall not be cause for discontinuance. Instead, Company shall mail or deliver written notice advising customer of the discovery and the steps that the Company will take to determine what amount of gas has been diverted and that Company may bill for any damage to company property and amounts of gas consumed but not billed.

Notice of disconnection is not required when Company:

- A. Determines that immediate shut off is imperative for health or safety reasons.
- B. Is ordered by governmental authority having jurisdiction due to alleged customer violations of ordinances, statutes or regulations covering utility service.
- C. Determines that service has been discontinued, in accordance with these rules, is discovered restored by someone other than the Company, and the original cause for the discontinuance has not been cured.

#### LINE EXTENSION

## 1. Extensions

## A. Main and Service Lines

Company will extend gas mains and install service lines for new full-service residential and commercial customers or for developers or builder(s) on behalf of new customers, based on a project economic feasibility study. The study generally compares anticipated margins from the new customer(s) with the estimated construction and operating costs to serve these customers.

Full-service customers utilize a natural gas furnace for primary space heating and natural gas water heating. Company will invest capital needed to serve each new full-service customer at no less than lower of the actual cost or the Company's statewide average investment in net plant per customer.

Partial-service customers who request gas service for less than full service (i.e. fireplace, pool heater, cooking), may be charged an additional amount based on Company's investment that includes the costs for required gas mains, services and meters. The additional amount to be charged to Partial-service customers may vary depending upon the level of revenue to be received by Company from the estimated natural gas usage compared to the actual costs to furnish natural gas service to those Partial-service customers.

If a property developer, builder, and/or customer is required to contribute to the investment to extend natural gas service, then that contribution in aid of construction (CIAC) shall be paid in advance by the property developer, builder(s), and/or new customers(s).

Unless agreed otherwise by Company, such contributions are non-refundable. However, under limited circumstances, where future growth is reasonably certain, a portion of the contribution applicable to main extensions may be refundable based on actual growth of new customers realized. Property developer, builder(s), and/or customers who make a refundable contribution to the main or service line extension, may be entitled to a <u>pro rata</u> share of refund of those advances. Any such refund will be computed as subsequent customer connections are completed based on feasibility studies. Any refundable contribution arrangement agreed to by Company shall be evidenced in writing at the time of the initial prior contribution and shall not be for a term beyond five years.

## LINE EXTENSION

## B. **Project Feasibility**

Project feasibility shall be determined by using current operating and construction costs, projected revenues and any related income tax impacts of the specific project. The projected rate of return will be determined by the Company. Any projected return deficiency will require an offsetting contribution to assure the project will not cause existing customers to subsidize new users. The project feasibility study will determine whether the investment to serve can be incurred without additional charges to the customer, subject to the statewide average investment per customer referred to above.

#### **COLD WEATHER RULE**

# 1. Availability

The provisions of the Cold Weather Rule (CWR) allow for special payment and disconnection procedures for any residential customer with unpaid arrearage to retain or restore utility service throughout the cold weather period, which extends from November 1st through March 31st.

# 2. No Disconnection When Temperature is Below 30 Degrees

The Company shall not disconnect a customer's service between November 1st and March 31st when the local national weather service office forecasts the temperature will drop below 30 degrees within the following 48-hour period unless:

- (1) It is at the customer's request;
- (2) The service is abandoned;
- (3) A dangerous condition exists on the customer's premises;
- (4) The customer violates any rule of the Company which adversely affects the safety of the customer or other persons, or the physical integrity of the Company's delivery system;
- (5) The customer causes or permits unauthorized interference with or diversion of use of (meter bypass) utility service situation or delivered on or about the customer's premises.

In any of these situations, the Company may disconnect service immediately. Service disconnected under (3), (4), or (5) above must be restored as soon as possible after the physical problems as defined therein have been corrected.

In order to keep from getting disconnected when the temperature is 30 degrees or above, or to get reconnected regardless of temperature, a customer must comply with the provisions of the Cold Weather Rule Tariff Requirements.

#### COLD WEATHER RULE

# 3. Cold Weather Rule Tariff Requirements

To qualify for the Cold Weather Rule Payment Agreement, the Customer shall:

- (1) Inform the Company of the customer's inability to pay the bill in full;
- (2) Give sufficient information to allow the Company to make a payment agreement;
- (3) Make full payment of the arrearage plus the bill for consumption during the most recent billing period for which service was provided divided by twelve (12) or less periods;
- (4) Apply for federal, state, local or other funds which the customer is eligible;
- (5) Enter a level payment plan for current and future consumption with arrears paid in equal installments over no more than the next eleven (11) months;
- (6) Not illegally divert (bypass meter) utility service;
- (7) Not default on a payment plan.

#### 4. Illegal Diversion of Service

If the Company documents that the customer has diverted (meter bypass) service and has benefited from such diversion, the customer shall be deemed to be in breach of the Cold Weather Rule Tariff Requirements. Such breach may be cured by payment by the customer for the value of the diverted service. The value of such use shall be estimated based on historic use of such customer or such residence.

#### 5. Defaulted Payment Arrangement

Any customer who has defaulted in the most recent cold weather period and remains in default has breached the requirements of the Cold Weather Rule Tariff Requirements. To cure such default, the customer shall make full payment as set forth in the Cold Weather Rule Tariff Requirements; pay any disconnect or reconnect charges incurred as a result of any default and complies with the provisions of the Cold Weather Rule Tariff Requirements.

The customer will be encouraged to renegotiate CWR payments if they receive utility or other lump sum assistance.

#### COLD WEATHER RULE

# 6. Company Responsibility

The Company shall notify each active residential customer of the Cold Weather Rule (CWR) once a year at least 30 days prior to the CWR period.

The Company shall in its 1) telephone contact(s), or 2) the personal contact, or 3) the disconnect message on the door, also provide the following information:

- (1) Inform the customer of the existence of the Cold Weather Rule and that the customer has an additional 30 days until disconnection, and that the customer can avoid disconnection by complying with the Cold Weather Rule Tariff Requirements;
- (2) Inform the customer of, or provide a list of, the Cold Weather Rule Tariff Requirements;
- (3) Inform the customer of, or provide a list of, organizations where funds are available to pay utility bills;
- (4) Inform the customer of, or provide a list of, other pay arrangements for which the customer might qualify.

#### PURCHASED GAS COST ADJUSTMENT (PGA)

#### I. TRADITONAL SALES SERVICE

#### 1. Purchased Cost of Gas:

For purposes of calculating the monthly gas purchase price per therm (PGA), costs shall include, but not limited to, upstream pipeline capacity, interstate pipeline transition charges, PNG Pipeline (Rate Area II only), interstate pipeline or supplier refunds, wholesale commodity cost, pipeline commodity transportation fuel.

The monthly PGA factor per therm shall be shown on the bill as a separate line item.

#### 2. Computation:

In addition to the base rates in effect for residential and commercial service, a charge per therm shall be added for the monthly average cost of purchased gas. The monthly charge per therm shall be calculated as follows:

$$PGA = \frac{G - R}{S}$$

Where:

PGA = Monthly estimated purchased gas cost factor per therm.

- G = The annualized estimated delivered costs, including L&U, for natural gas purchased for resale, based on prices in effect for the current month.
- R = The annualized amount of any refunds received from any gas suppliers or interstate pipeline.
- S = Estimated annual firm sales volumes (therms).

#### 3. Annual Gas Cost Reconciliation:

Annually, on or before October 1st, Aquila shall compute a "Gas Cost Reconciliation Factor" (GCR) for each Rate Area. The computation will compare the actual cost of gas purchased (including propane) with actual billed revenue arising from the components of retail rates, which are attributable to the cost of gas purchased. Each such comparison shall be for the year ended the immediately preceding June 30. The computation will specify a reconciliation rate adjustment to become effective November 1. This GCR adjustment will correct for any difference between gas cost incurred on behalf of the traditional sales customer and gas cost recovered for the reconciliation year ended June 30, and will correct for the previous year's reconciliation adjustment.

Date Issued: November 15, 2006 Issued By: Steven M. Jurek Vice President, Regulatory Affairs

AQUILA INC. d/b/a AQUILA NETWORKS Index No. 8

Second Revised: Index No. 8

Replacing: First Revised Index No. 8

Effective: December 1, 2005

Nebraska Operations

Sheet 2 of 4

# PURCHASED GAS COST ADJUSTMENT (PGA) (Continued)

$$GCR = \frac{P - BR + D}{S}$$

Where:

P = Actual annual cost of all gas cost components described in Paragraph I (1).

BR = Annual billed revenue for the reconciling period described in Paragraph I (3).

S = Estimated annual sales volumes (therms) for the PGA customers.

D = Annual bad debt component as allowed in Docket No. NG-004.1.

The GCR factor per therm shall be shown as a separate line item on the customer's monthly bill.

## II. ANNUAL PRICE SALES SERVICE (optional)

### 1. <u>Annual Price Option Cost of Gas:</u>

The rate per therm for the Annual Price Option cost of gas shall remain constant during the twelve month period beginning November 1 and ending October 31 of the following year. The Annual Price Option (APO) shall be calculated on a per therm basis and shall include, but not limited to, upstream pipeline capacity, interstate pipeline transition charges, PNG Pipeline (Rate Area II only), interstate pipeline and supplier refunds, estimated wholesale commodity cost, pipeline commodity transportation, and fuel.

The APO shall be shown on the customer's bill as a separate line item labeled "PGA".

#### 2. Computation:

In addition to the base rates in effect for residential and commercial service, a charge per therm shall be added for the monthly usage of natural gas. The APO charge per therm shall be calculated as follows:

$$\frac{G - R}{S}$$
 (Shown as "PGA" on customer's bill)

Date Issued: May 1, 2006
Issued By: Steven M. Jurek
Vice President, Regulatory Affairs

Effective Date: November 1, 2006

Third Revised: Sheet 3 of 4

Replacing: Second Revised Sheet 3 of 4

Effective: November 1, 2006

Nebraska Operations

Sheet 3 of 4

# PURCHASED GAS COST ADJUSTMENT (PGA) (Continued)

Where:

APO = Annual Price Option gas cost factor per therm.

- G = The estimated annualized estimated delivered costs, including L&U for natural gas purchased for resale, based on price projections for the twelve month period.
- R = The annualized amount of any refunds received from any gas suppliers or interstate pipeline.
- S = Estimated annual firm sales volumes (therms).

#### 3 Annual Gas Cost Reconciliation:

Annually, on or before October 1st, Aquila shall compute a "Gas Cost Reconciliation Factor" (GCR) for each Rate Area. The computation will compare the actual cost of gas purchased (including propane) with actual billed revenue arising from the components of retail rates, which are attributable to the cost of gas purchased. Each such comparison shall be for the year ended the immediately preceding June 30th. The computation will specify a reconciliation rate adjustment to become effective November 1st. This GCR adjustment will correct for any difference between gas cost incurred on behalf of the APO customers and gas cost recovered for the reconciliation year ended June 30th and will correct for the previous year's reconciliation adjustment.

$$GCR = \underline{P - BR + D}$$

Where:

P = Actual annual cost of all gas cost components described in Paragraph II (1) above, purchased on behalf of APO customers.

BR = Annual billed revenue for the reconciling period described in Paragraph II (3).

D = Annual bad debt component as allowed in Docket No. NG-004.1.

S = Estimated annual sales volume (therms) for APO customers.

Replacing: Second Revised Sheet 4 of 4

Effective: November 1, 2006

Nebraska Operations

Sheet 4 of 4

# PURCHASED GAS COST ADJUSTMENT (PGA) (Continued)

#### III. GENERAL REMARKS

#### 1. Bad Debts Currently Collected in Rates:

The bad debt component "D" is computed annually, and is the difference between the gas purchase component of actual Net Write-offs and the gas purchase component collected in the PGA, plus or minus any over or under-collection of previous years write-offs

#### 2. Remaining GCR Balance:

Any GCR remaining balances at the end of a 12-month amortization period shall remain with customers electing the APO for the ensuing 12-month period. Similarly, any remaining balance in the GCR attributed to traditional sales customers shall remain with traditional sales customers. Pro rata adjustments to the GCR balance will be made to reflect the migration of customers between the APO Program and Traditional Sales Service.

#### RATE SCHEDULE - APO ANNUAL PRICE OPTION – PILOT PROGRAM

- AVAILABILITY: Service under this rate schedule is available only to any residential customer 1. located in Aquila's service territory and who has elected this service for the twelve month period. Initial availability under this pilot program is limited to a prescribed number of residential customers in each of Aquila's Rate Areas on a first-come, first-served basis. The program will be limited to those customers receiving verification of their election from Aquila.
- APPLICABILITY AND CHARACTER OF SERVICE: The program's twelve month period is from 2. November 1 through October 31st. This rate schedule shall apply to firm gas service for customers whose normal requirements do not exceed 500 Therms on a peak day and such service shall not be subject to curtailment or interruption. The rate per therm for the delivered commodity cost of gas, including upstream pipeline cost, (PGA) shall be held constant during the twelve months beginning November 1 and ending October 31 of the following year.

- 5. ENERGY EFFICIENCY RIDER: The Energy Efficiency Rider, in accordance with First Revised Index No. 17, is in addition to the Delivery Charge.
- 6. DUE DATE: Bills will be due 20 days after Aquila's Mailing Date.
- 7. LATE PAYMENT PENALTY: One percent (1%) of balance not paid on or before due date.
- 8. FRANCHISE FEE: A franchise fee will be added to the monthly bill computed on this rate schedules when appropriate.
- 9. REGULATORY ASSESSMENT AND TAXES: Regulatory Assessment or other taxes, fees, or charges required by a governmental authority will be added to the monthly bill.
- 10. CUSTOMER EDUCATION SURCHARGE: A surcharge for customer education, promotion, and other expenses associated with Aquila's Annual Price Option Program may be shown as a separate component on the bill. The Customer Education Surcharge shall be computed once annually, based on actual expense incurred, and collected from all residential customers.
- 11. TIMING: The PGA shall be determined on or before May 1 of each year. The GCR will be determined on or before October 15<sup>th</sup> of each year as part of the Annual Gas Cost Reconciliation. Both the PGA and GCR will be effectuated on November 1<sup>st</sup> of each year.
- 12. TERMINATION: The Annual Price Option Program is a pilot program and may be cancelled at the sole discretion of the Company subject only to any further abandonment approval required by the Company from the Nebraska Public Service Commission. Any over (under) GCR balance attributed to this program at the time of termination will be added to the General Service GCR for the following year, or will be dissolved through any other mutually accepted mechanism adopted by the Company.
- 13. REMARKS: Adds the Energy Efficiency Rider.

## RATE SCHEDULE - EO ENERGY OPTIONS PROGRAM (Transportation)

#### 1. AVAILABILITY:

Available only to any Commercial or Small Industrial Firm customer in Nebraska with natural gas transportation requirements of less than 500 Therms per day for the delivery of gas owned by the customer from Aquila's Town Border Station(s) to a meter location on the customer's premise. Customer must sign a contract with a qualified Marketer participating in Aquila's Energy Options Program. An Energy Options Marketer's participation in Aquila's Energy Options Program is conditioned on the Marketer's compliance with the following requirements: 1) providing Aquila with a copy of its approved Competitive Natural Gas Provider (CNGP) certificate from the Public Service Commission and 2) entering into a "Marketer Agreement" setting forth non-discriminatory operating conditions and related requirements, rights, obligations and agreements, applied by Aquila without preference to any Marketer or affiliate. Aquila reserves the unilateral right to alter or amend or revise the requirements under this Energy Options tariff or it Marketer Agreement, subject to Commission approval.

Availability of local gas transportation services under the Energy Options Program is subject to system operational considerations. This Energy Options program is not available to Residential Customers of Aquila.

#### 2. APPLICABLITY AND CHARACTER OF SERVICE:

This Rate Schedule shall apply to Commercial or Small Industrial Firm Customers whose natural gas transportation requirements are less than 500 Therms per day and such transportation service is not subject to interruption.

#### 3. RATE INFORMATION:

Pipelines:

Northern Natural Gas Company

Kinder Morgan, Inc.

Natural Gas Pipeline Company of America (NGPL)

Customer Charge:

\$15.00

per month

Transportation Charge:

Rate Area One

\$.12700

per therm plus L&U Factor

Rate Area Two

\$.15922

per therm plus L&U Factor

Rate Area Three

\$.15266

per therm plus L&U Factor

Minimum monthly bill shall be the Customer Charge.

# RATE SCHEDULE ENERGY OPTIONS PROGRAM (Transportation Continued)

Company's System Lost and Unaccounted for gas shall be computed in accordance with Original Index 8.

- 4. ADJUSTMENT FOR PURCHASED GAS OR OTHER TRANSPORTATION SERVICES: Customer is billed only for the Customer Charge, Transportation Charge, L&U Factor, and Marketer's commodity charge (where applicable); Marketer is billed for all other transportation services and charges.
- 5. ENERGY EFFICIENCY RIDER: The Energy Efficiency Rider, in accordance with First Revised Index No. 17, is in addition to the Transportation Charge.
- 6. DUE DATE:

Bill will be due 20 days after Aquila's bill issuance date. Late Payment Penalty: One percent (1%) of balance not paid on or before the Due Date.

7. FRANCHISE FEE:

A franchise fee will be added to the monthly bill in those Communities that impose a franchise fee.

8. REGULATORY ASSESSEMNT AND TAXES:

Regulatory Assessment or other taxes, fees, or charges required by a governmental authority will be added to the monthly bill.

9. TERMINATION:

Customer must advise Aquila 30 days in advance in writing when it wishes to terminate services under the Energy Options Program. Subject to Commission approval, this service may be terminated by Company.

#### **ENERGY EFFICIENCY RIDER (EER)**

- 1. DESCRIPTION: The Energy Efficiency Rider provides funding for the Company's demand side programs. These programs offer rebates for energy efficient appliances and equipment for residential customers and weatherization services and emergency replacements for high efficiency furnace heating and water heating equipment to low-income customers. The low-income services of this program are distributed by local Community Action Agencies and are administered by Aquila Networks in coordination with the Salvation Army.
- 2. AVAILABILITY: The program is available to any residential customer served on Aquila Networks rate schedules TSS and APO.. The low-income services are available to those customers that also qualify as "low income" under the current Low Income Home Energy Assistance Program (LIHEAP) criteria.
- 3. FUNDING: Funding of the demand side programs shall be through an Energy Efficiency Rider (EER) added to Aquila Networks rate schedules TSS, APO and EO. The EER shall be collected on a volumetric basis and computed as follows:

$$EER = \underbrace{- KAB + PYR}_{AT}, \text{ where}$$

- EAB = Estimated Annual Budget for the approved energy efficiency project, which shall include the annual estimated cost of the program components (parts and labor), administration, advertising/promotion, and evaluation.
- PYR = Prior Year Reconciliation of total EER collected versus the actual expenditures.
- AT = Annual Throughput, which is the projected annual sales volume.

#### **CUSTOMER DEPOSITS**

#### **Deposit Policy**

#### 1. Residential:

The Company may require a cash deposit on residential customers who demonstrate credit risk. Demonstrated credit risk is defined as having one disconnection of service during the last year of service, or three or more disconnection notices during the last year of service, or has an undisputed unpaid debt with the company.

If a customer is unable to pay the full amount of the deposit, at the discretion of the Company, the customer may pay the deposit in installments, or provide a guarantor who has satisfactory credit.

#### 2. Commercial:

The Company may require a cash deposit on commercial customers that demonstrate credit risk. Demonstrated credit risk is defined as having more than one late payment in the last twelve months or having no prior credit history with the company.

#### 3. Deposit Amount and Refunds:

The deposit amount shall be equal to one-sixth of the estimated annual bill or an existing deposit may be increased to that level.

Customer deposits shall accumulate interest to be calculated annually and paid at an annual rate of simple interest of 5%.

Deposits for all customers will be reviewed annually and refunds made to customers whose account is current and with no more than one late payment within the past twelve months.

#### 4. Hardship Deposit Waiver or Suspension:

From time to time and upon no less than one-day notice to the Commission, Company may waive or suspend the Customer deposit requirement for a reasonable period of time during periods of Customer extreme hardship in order to avoid disconnection of Customer's natural gas service or to promote additional Customer reconnections.

The waiver or suspension of the Customer deposit requirement for hardship includes, but is not limited to, deposits required soon after the Cold Weather period expires. The waiver or suspension shall apply to all new customer deposits required during the waiver or suspension period. The Customer deposit waiver or suspension may be limited by Company to either its Residential or Commercial class of customers.

Issued By: Steven M. Jurek

Vice President, Regulatory Affairs

First Revised Sheet 1 of 2
Replacing: Original Sheet 1 of 2
Effective: June 1, 2005

Nebraska Operations

Sheet 1 of 2

#### **BILLING AND PAYMENT**

#### 1. Bills, Duplicate Bills, Failure to Receive Bills

All bills periodically rendered to customers for metered services shall be based on actual or estimated readings at local pressure base and shall show in addition to the net dollar amount due, the date on which the current reading was taken, the meter readings at the beginning and end of the period for which the bill is rendered, the date when payment is due, the total consumption expressed in cubic feet or other unit of service recorded by the meter read, and whether the bill is actual or estimated.

Bills may be rendered based on bimonthly meter readings whereby the customer's meter will actually be read every other month. In those months where the meter is not actually read, the customer's bill will be computer or manually estimated.

Upon request, the Company shall give the customer the approximate date on which he should receive his bill each month; and if a bill is not received or lost, the Company shall, upon request, issue a duplicate. Failure to receive a bill shall not relieve a customer from complying with the applicable rate schedule and these general service terms and conditions.

#### 2. Due Dates of Bills

Bills, including charges for gas service, deposits and other charges contained in this tariff are due and payable within twenty days after mailing. An unpaid bill will not be considered past due until twenty days after mailing. The due date shall be clearly stated on the face of the bill.

# 3. Streamline and CheckLine<sup>TM</sup> Plans

#### A. Streamline Plan

The Company shall offer to all residential customers a "Streamline Plan" billing program, which allows the customer to pay a uniform amount per month. Customers may enroll in the program during any month of the year. The company may recalculate the monthly Streamline amount at intervals throughout the year, if needed, and communicate the changed monthly amount to the customer. Participation in this program would be at the Customer's option and request, and all normal billing and consumption information would be shown on the billing statements in addition to the monthly Streamline payment amount.

Customers who are removed from the Streamline billing plan for non payment may not be allowed back onto the plan until their account is current.

Customers may be removed from the Streamline billing plan at anytime at their request.

# BILLING AND PAYMENT

#### B. CheckLine<sup>TM</sup> Plan

CheckLine<sup>TM</sup> is available to all customers with a bank or credit union account. Customer authorizes monthly energy billing to be charged to their checking or savings account electronically. Written authorization is required to initiate, and cancellation can be done verbally or in writing. The Company may modify or cancel this program without further approval.

#### DISCONNECTIONS

#### 1. Energy Diversion - Theft of Services

If any device is found installed on customer's premises which prevents the meter from accurately recording consumption or bypasses the meter, such device and gas meter shall be removed for safety reasons without prior notice to the customer.

However, written notice must be left at the premises advising the customer of the nature of the violation, the steps the Company is taking to correct it, and the Company's right to bill for any damage to company property and estimated consumption not properly registered.

The company will calculate the amount of gas consumed, but not properly registered, and bill the customer for the estimated gas, the company labor and material cost for the damaged company property.

Prior notice of disconnection is not required when Company:

- A. Determines that immediate shut off is imperative for health or safety reasons.
- B. Is ordered by governmental authority having jurisdiction due to alleged customer violations of ordinances, statutes or regulations covering utility service.
- C. Determines that service has been discontinued, in accordance with these rules, is discovered restored by someone other than the Company, and the original cause for the discontinuance has not been cured. The Company may remove the meter and leave notice for the customer.

#### COLD WEATHER RULE

#### 1. Availability

The provisions of the Cold Weather Rule (CWR) allow for special payment and disconnection procedures for any residential customer with unpaid arrearage to retain or restore utility service throughout the cold weather period, which extends from November 1st through March 31st.

#### 2. Residential Winter Disconnection

The Company shall not disconnect a residential customer's service between November 1st and March 31st without adding to the time for payment of a bill an additional 30 days before disconnection. A customer may avoid disconnection if they meet the requirements of the Cold Weather Rule.

#### 3. Cold Weather Rule Tariff Requirements

To avoid disconnection or have service restored under the Cold Weather Rule, the Customer shall:

- (1) Inform the Company of the customer's inability to pay the bill in full.
- (2) Give sufficient information to allow the Company to arrange a payment agreement.
- (3) Make an initial payment of one-fourth (1/4) of the total utility arrearage, plus the full amount of the current month's utility bill, plus any required reconnection fee or deposit.
- (4) Apply for federal, state, local or other funds which the customer is eligible.
- (5) Enter into a 3-month level payment plan covering the remaining utility balance plus the current monthly bills.
- (6) Not illegally divert utility service.
- (7) Keep all pay agreements as arranged.

Sheet 2 of 3

#### COLD WEATHER RULE

#### 4. Illegal Diversion of Service

If the Company documents that the customer has diverted service and has benefited from such diversion, the diversion will be treated as "Theft of Service" under Index No. 24, and the customer shall be deemed to be in breach of the Cold Weather Rule Tariff Requirements. Such breach may be cured by payment by the customer for the amount billed for the estimated gas consumed and all other expenses incurred by the Company in accordance with Index No. 24.

#### 5. Defaulted Payment Arrangement

Any customer who has defaulted in the most recent cold weather period and remains in default has breached the requirements of the Cold Weather Rule. To avoid disconnection or to restore service, the customer may be offered another payment agreement at the Company's discretion. If the customer defaults on the payment plan, the Company may disconnect service after providing the requisite notice.

The customer will be encouraged to renegotiate CWR payments if they receive utility or other lump sum assistance.

#### 6. Company Responsibility

The Company shall notify each active residential customer of the Cold Weather Rule (CWR) once a year at least 30 days prior to the CWR period.

The Company shall in its 1) telephone contact(s), or 2) the personal contact, or 3) the disconnect message on the door, also provide the following information:

- (1) Inform the customer of the existence of the Cold Weather Rule and that the customer has an additional 30 days until disconnection, and that the customer can avoid disconnection by complying with the Cold Weather Rule Tariff Requirements:
- (2) Inform the customer of, or provide a list of, the Cold Weather Rule Tariff Requirements;
- (3) Inform the customer of, or provide a list of, organizations where funds are available to pay utility bills;
- (4) Inform the customer of, or provide a list of, other pay agreements for which the customer might qualify.

#### PURCHASED GAS COST ADJUSTMENT (PGA)

#### I. TRADITONAL SALES SERVICE

#### 1. Purchased Cost of Gas:

For purposes of calculating the monthly gas purchase price per therm (PGA), costs shall include, but not limited to, upstream pipeline capacity, interstate pipeline transition charges, PNG Pipeline (Rate Area II only), interstate pipeline or supplier refunds, wholesale commodity cost, pipeline commodity transportation fuel.

The monthly PGA factor per therm shall be shown on the bill as a separate line item.

#### 2. Computation:

In addition to the base rates in effect for residential and commercial service, a charge per therm shall be added for the monthly average cost of purchased gas. The monthly charge per therm shall be calculated as follows:

$$PGA = \frac{G - R}{S}$$

Where:

PGA = Monthly estimated purchased gas cost factor per therm.

- G = The annualized estimated delivered costs, including L&U, for natural gas purchased for resale, based on prices in effect for the current month.
- R = The annualized amount of any refunds received from any gas suppliers or interstate pipeline.
- S = Estimated annual firm sales volumes (therms).

#### 3. Annual Gas Cost Reconciliation:

Annually, on or before October 1st, Aquila shall compute a "Gas Cost Reconciliation Factor" (GCR) for each Rate Area. The computation will compare the actual cost of gas purchased (including propane) with actual billed revenue arising from the components of retail rates, which are attributable to the cost of gas purchased. Each such comparison shall be for the year ended the immediately preceding August 31June 30. The computation will specify a reconciliation rate adjustment to become effective November 1. This GCR adjustment will correct for any difference between gas cost incurred on behalf of the traditional sales customer and gas cost recovered for the reconciliation year ended August 31June 30, and will correct for the previous year's reconciliation adjustment.

# PURCHASED GAS COST ADJUSTMENT (PGA) (Continued)

$$GCR = \frac{P - BR + D}{S}$$

Where:

P = Actual annual cost of all gas cost components described in Paragraph I (1).

BR = Annual billed revenue for the reconciling period described in Paragraph I (3).

S = Estimated annual sales volumes (therms) for the PGA customers.

D = Annual bad debt component as allowed in Docket No. NG-004.1.

The GCR factor per therm shall be shown as a separate line item on the customer's monthly bill.

## II. ANNUAL PRICE SALES SERVICE (optional)

#### 1. Annual Price Option Cost of Gas:

The rate per therm for the Annual Price Option cost of gas shall remain constant during the twelve month period beginning November 1 and ending October 31 of the following year. The Annual Price Option (APO) shall be calculated on a per therm basis and shall include, but not limited to, upstream pipeline capacity, interstate pipeline transition charges, PNG Pipeline (Rate Area II only), interstate pipeline and supplier refunds, estimated wholesale commodity cost, pipeline commodity transportation, and fuel.

The APO shall be shown on the customer's bill as a separate line item labeled "PGA".

#### 2. Computation:

In addition to the base rates in effect for residential and commercial service, a charge per therm shall be added for the monthly usage of natural gas. The APO charge per therm shall be calculated as follows:

$$APO = \frac{G - R}{S}$$
 (Shown as "PGA" on customer's bill)

# PURCHASED GAS COST ADJUSTMENT (PGA) (Continued)

 $GCR = \underbrace{P - BR + D}_{S}$ 

Where:

- P = Actual annual cost of all gas cost components described in Paragraph II (1) above, purchased on behalf of APO customers.
- BR = Annual billed revenue for the reconciling period described in Paragraph II (3).
  - D = Annual bad debt component as allowed in Docket No. NG-004.1.
  - S = Estimated annual sales volume (therms) for APO customers.

#### III. GENERAL REMARKS

#### 1.Lost and Unaccounted for Gas (L&U):

Annually, on or before August 31, Aquila shall compute the L&U Factor, which measures system losses due to leaks, variances in meter calibration, friction losses, etc. The factor shall be computed by comparing total system inputs (receipts) to total system outputs (deliveries).

The factor, up to an allowable of 4% shall be applied to the estimated average annualized delivered gas cost for all sales customers and added to the estimated annualized cost to determine the monthly purchased cost of gas.

#### 21. Bad Debts Currently Collected in Rates:

The bad debt component "D" is computed annually, and is the difference between the gas purchase component of actual Net Write-offs and the gas purchase component of bad debt expense currently being collected in rates. The gas purchases components of bad debt expense currently being collected in rates are: Rate Area One \$63,956; Rate Area Two \$382,472; Rate Area Three \$113,290. collected in the PGA, plus or minus any over or undercollection of previous years write-offs

#### 23. Remaining GCR Balance:

Any GCR remaining balances at the end of a 12-month amortization period shall remain with customers electing the APO for the ensuing 12-month period. Similarly, any remaining balance in the GCR attributed to traditional sales customers shall remain with traditional sales customers. Pro rata adjustments to the GCR balance will be made to reflect the migration of customers between the APO Program and Traditional Sales Service.

#### RATE SCHEDULE <u>- APO</u> ANNUAL PRICE OPTION – PILOT PROGRAM

- 1. AVAILABILITY: Service under this rate schedule is available only to any residential customer located in Aquila's service territory and who has elected this service for the twelve month period. Initial availability under this pilot program is limited to a prescribed number of residential customers in each of Aquila's Rate Areas on a first-come, first-served basis. The program will be limited to those customers receiving verification of their election from Aquila.
- 2. APPLICABILITY AND CHARACTER OF SERVICE: The program's twelve month period is from November 1 through October 31<sup>st</sup>. This rate schedule shall apply to firm gas service for customers whose normal requirements do not exceed 500 Therms on a peak day and such service shall not be subject to curtailment or interruption. The rate per therm for the delivered commodity cost of gas, including upstream pipeline cost, (PGA) shall be held constant during the twelve months beginning November 1 and ending October 31 of the following year.

# RATE SCHEDULE <u>- EO</u> ENERGY OPTIONS PROGRAM (Transportation)

#### 1. AVAILABILITY:

Available only to any Commercial or Small Industrial Firm customer in Nebraska with natural gas transportation requirements of less than 500 Therms per day for the delivery of gas owned by the customer from Aquila's Town Border Station(s) to a meter location on the customer's premise. Customer must sign a contract with a qualified Marketer participating in Aquila's Energy Options Program. An Energy Options Marketer's participation in Aquila's Energy Options Program is conditioned on the Marketer's compliance with the following requirements: 1) providing Aquila with a copy of its approved Competitive Natural Gas Provider (CNGP) certificate from the Public Service Commission and 2) entering into a "Marketer Agreement" setting forth non-discriminatory operating conditions and related requirements, rights, obligations and agreements, applied by Aquila without preference to any Marketer or affiliate. Aquila reserves the unilateral right to alter or amend or revise the requirements under this Energy Options tariff or it Marketer Agreement, subject to Commission approval.

Availability of local gas transportation services under the Energy Options Program is subject to system operational considerations. This Energy Options program is not available to Residential Customers of Aquila.

#### 2. APPLICABLITY AND CHARACTER OF SERVICE:

This Rate Schedule shall apply to Commercial or Small Industrial Firm Customers whose natural gas transportation requirements are less than 500 Therms per day and such transportation service is not subject to interruption.

#### **CUSTOMER DEPOSITS**

#### **Deposit Policy**

#### 1. Residential:

The Company will-may require a cash deposit on residential customers that who demonstrate credit risk. Demonstrated credit risk is defined as having more than one late payment in the last twelve months one disconnection of service during the last year of service, or three or more disconnection notices during the last year of service, or has an undisputed unpaid debt with the company.

The deposit amount should be equal to the one month's highest energy bill in the previous twelve-month period. will shall be one sixth of the estimated annual bill or an existing deposit may be increased to that level. If a customer is unable to pay the full amount of the deposit, Aat the discretion of the Company. The customer may pay the deposits in installments not to exceed three months, or provide a guaranter who has satisfactory credit. with the company.

Customer deposits shall accumulate interest to be calculated annually and paid at an annual rate of simple interest of 5%.

Deposits for residential customers will be reviewed annually and refunds made to customers whose account is current and no more than one payment within the past twelve months was made after the due date.

#### 2. Commercial:

The Company may require a cash deposit on commercial customers that demonstrate credit risk. Demonstrated credit risk is defined as having more than one late payment in the last twelve months disconnection of service during the last year of service, or three or more disconnection notices during the last year of service, has an undisputed unpaid debt with the company, or having no prior credit history with the company, more than one late payment in the last twelve months.

#### 3. Deposit Amount and Refunds:

The deposit amount should be equal to one and one half times the highest energy bill in the previous twelve month periodshall be equal to one-sixth of the estimated annual bill or an existing deposit may be increased to that level.

Customer deposits shall accumulate interest to be calculated annually and paid at an annual rate of simple interest of 5%.

Deposits for commercial <u>all</u> customers will be reviewed annually and refunds made to customers whose account is current and <u>with no more than one late payment within the past twelve months. was made after the due date.</u>

## 3.4 Hardship Deposit Waiver or Suspension:

From time to time and upon no less than one-day notice to the Commission, Company may waive or suspend the Customer deposit requirement for a reasonable period of time during periods of Customer extreme hardship in order to avoid disconnection of Customer's natural gas service or to promote additional Customer reconnections.

The waiver or suspension of the Customer deposit requirement for hardship includes, but is not limited to, deposits required soon after the Cold Weather period expires. The waiver or suspension shall apply to all new customer deposits required during the waiver or suspension period. The Customer deposit waiver or suspension may be limited by Company to either its Residential or Commercial class of customers.

#### **BILLING AND PAYMENT**

#### 1. Bills, Duplicate Bills, Failure to Receive Bills

All bills periodically rendered to customers for metered services shall be based on actual or estimated readings at local pressure base and shall show in addition to the net dollar amount due, the date on which the current reading was taken, the meter readings at the beginning and end of the period for which the bill is rendered, the date when payment is due, the total consumption expressed in cubic feet or other unit of service recorded by the meter read, and whether the bill is actual or estimated.

Bills may be rendered based on bimonthly meter readings whereby the customer's meter will actually be read every other month. In those months where the meter is not actually read, the customer's bill will be computer or manually estimated.

Upon request, the Company shall give the customer the approximate date on which he should receive his bill each month; and if a bill is not received or lost, the Company shall, upon request, issue a duplicate. Failure to receive a bill shall not relieve a customer from complying with the applicable rate schedule and these general service terms and conditions.

#### 2. Due Dates of Bills

Bills, including charges for gas service, deposits and other charges contained in this tariff are due and payable within twenty days after mailing. An unpaid bill will not be considered past due until twenty days after mailing. The due date shall be clearly stated on the face of the bill.

#### Streamline and CheckLine<sup>TM</sup> Plans 3.

#### Streamline Plan Α.

The Company shall offer to all residential customers and commercial firm customers in good standing ana "Streamline Plan" billing program, which allows the customer to pay a uniform amount for eleven (11) months with the twelfth (12) month (July) being theper month to balance the account. Such eCustomers may enroll in the program during any month of the year. The company may recalculate the monthly Streamline amount at intervals throughout the year, if needed, and communicate the changed monthly amount to the customer. Participation in this program would be at the Customer's option and request, and all normal billing and consumption information would be shown on the billing statements in addition to the monthly Streamline payment amount.

Customers who are removed from the Streamline billing plan for non payment may not be allowed back onto the plan until their account is current.

Customers may be removed from the Streamline billing plan at anytime at their request.

#### В. CheckLine™ Plan

CheckLine<sup>TM</sup> is available to all customers with a bank or credit union account. Customer authorizes monthly energy billing to be charged to their checking or savings

#### DISCONNECTIONS

#### **Energy Diversion - Theft of Services** 1.

If any device is found installed on customer's premises which prevents the meter from accurately recording consumption, notice may be issued to the customer giving ten (10) days in which to remove such device and related appurtenances. Company has the right to bill customer for any damage to company property and estimated amounts of gas consumed, but not properly registered.

As an alternative to the above, the Company may elect to remove or correct any energy diverting device in which case any temporary interruption of service for the purpose of repair or remedy shall not constitute discontinuance, and thus shall not require advance notice or bypasses the meter, such devisce and orgas meter may shall be removed for safety reasons without prior notice to the customer.

However, written notice must be left at the premises advising the customer of the nature of the violation, the steps the Company haisis taking to correct it, and the Company's right to bill for any damage to company property and estimated consumption not properly registered.

The company will calculate the amount of gas consumed, but not properly registered, and bill the customer for the estimated gas, the company labor and material costs for the damaged company property.

#### Prior

In and by itself, discovery that a meter has been tampered with shall not be cause for discontinuance. Instead, Company shall mail or deliver written notice advising customer of the discovery and the steps that the Company will take to determine what amount of gas has been diverted and that Company may bill for any damage to company property and amounts of gas consumed but not billed.

NnPrior notice of disconnection is not required when Company:

- A. Determines that immediate shut off is imperative for health or safety reasons.
- Is ordered by governmental authority having jurisdiction due to alleged customer violations В. of ordinances, statutes or regulations covering utility service.
- C. Determines that service has been discontinued, in accordance with these rules, is discovered restored by someone other than the Company, and the original cause for the discontinuance has not been cured. The Company may remove the meter and leave notice for the customer.

#### COLD WEATHER RULE

#### Availability 1.

The provisions of the Cold Weather Rule (CWR) allow for special payment and disconnection procedures for any residential customer with unpaid arrearage to retain or restore utility service throughout the cold weather period, which extends from November 1st through March 31st.

#### Residential Winter Disconnection When Temperature is Below 30 Degrees 2.No 2.

- The Company shall not disconnect a residential customer's service between November 1st and March 31st without adding to the time for payment of a bill an additional 30 days before disconnection. A customer may avoid disconnection if they meet the requirements of the Cold Weather Rule. when the local national weather service office forecasts the temperature will drop below 30 degrees within the following 48 hour period unless:
- It is at the customer's request;
  - The service is abandoned;
  - A dangerous condition exists on the customer's premises;
  - The customer violates any rule of the Company which adversely affects the safety of the customer or other persons, or the physical integrity of the Company's delivery system;
  - The customer causes or permits unauthorized interference with or diversion of use of (meter bypass) utility service situation or delivered on or about the customer's premises.

In any of these situations, the Company may disconnect service immediately. Service disconnected under (3), (4), or (5) above must be restored as soon as possible after the physical problems as defined therein have been corrected.

In order to keep from getting disconnected when the temperature is 30 degrees or above, or to get reconnected regardless of temperature, a customer must comply with the provisions of the Cold Weather Rule Tariff Requirements.

#### COLD WEATHER RULE

### 3. Cold Weather Rule Tariff Requirements

To qualify for the avoid disconnection or have service restored under the Cold Weather Rule, Payment Agreement, the Customer shall:

- (1) Inform the Company of the customer's inability to pay the bill in full;
- (2) Give sufficient information to allow the Company to <u>make arrange</u> a payment agreement;
- (3) Make <u>full an initial</u> payment of <u>one-fourth (1/4) of the total utility</u> arrearage, plus the <u>full amount of the current month's utility bill for consumption during the most recent</u> <u>billing period for which service was provided, plus any required reconnection fee or deposit. divided by twelve (12) or less periods;</u>
- (4) Apply for federal, state, local or other funds which the customer is eligible;
- (5) Enter into a 3-month level payment plan covering the remaining utility balance plus the for-current monthly bills. and future consumption with arrears paid in equal installments over no more than the next eleven (11) months;
- (6) Not illegally divert (bypass meter) utility service;
- (7) Not default on a payment plan. Keep all pay agreements as arranged.

#### 4. Illegal Diversion of Service

If the Company documents that the customer has diverted (meter bypass) service and has benefited from such diversion, the diversion will be treated as "Theft of Service" under Index No. 24, and the customer shall be deemed to be in breach of the Cold Weather Rule Tariff Requirements. Such breach may be cured by payment by the customer for the valuethe amount billed for the estimated gas consumed and all other expenses incurred by the Company in accordance with Index No. 24 of the diverted service. The value of such use shall be estimated based on historic use of such customer or such residence.

#### 5. Defaulted Payment Arrangement Agreement

Any customer who has defaulted in the most recent cold weather period and remains in default has breached the requirements of the Cold Weather Rule. Tariff Requirements. To avoid disconnection or to restore service, the customer may be offered another payment agreement at the Company's discretion. If the customer defaults on the payment plan, the Company may disconnect service after providing the requisite notice. To cure such default, the customer shall make full payment as set forth in the Cold Weather Rule Tariff Requirements; pay any disconnect or reconnect charges incurred as a result of any default and complies with the provisions of the Cold Weather Rule Tariff Requirements.

The customer will be encouraged to renegotiate CWR payments if they receive utility or other lump sum assistance.

#### **COLD WEATHER RULE**

#### 6. Company Responsibility

The Company shall notify each active residential customer of the Cold Weather Rule (CWR) once a year at least 30 days prior to the CWR period.

The Company shall in its 1) telephone contact(s), or 2) the personal contact, or 3) the disconnect message on the door, also provide the following information:

- (1) Inform the customer of the existence of the Cold Weather Rule and that the customer has an additional 30 days until disconnection, and that the customer can avoid disconnection by complying with the Cold Weather Rule Tariff Requirements;
- (2) Inform the customer of, or provide a list of, the Cold Weather Rule Tariff Requirements;
- (3) Inform the customer of, or provide a list of, organizations where funds are available to pay utility bills;
- (4) Inform the customer of, or provide a list of, other pay arrangements agreements for which the customer might qualify.

#### 6. Low Income Residential Customers (LIHEAP)

If a residential customer has been certified as eligible for low income home energy assistance and has communicated such eligibility to the Company and has provided acceptable documentation to the Company within a reasonable time, then no disconnection shall occur during the cold weather period.
